HENDERSON SILVER KNIGHTS

— TRACE ■ CARVE ■ SHAVE/SCRAPE

TIPS

Due to the intricacy of the pattern, we recommend that you enlarge the pattern on a copier to fit your pumpkin.

1. Save the pattern to refer to it while carving.
2. Hollow out and slightly thin your pumpkins shell.
3. Trace the design by using a pin to prick small holes through the paper into the pumpkin (following the lines).
4. Shave/scrape away just enough of the outside of the horseshoe so the light will glow through.
5. Carefully carve away the rest of the horseshoe. Be sure to keep your saw blade at a 90° angle.
